SCHOOL OF CONTINUING AND LIFELONG EDUCATION

“If we can help every one of us discover our interests and aspirations, uncover our innate talents and abilities, and deepen our skills over our lifetimes, that will become an enduring strength for the collective, for Singapore.”

Mr Ong Ye Kung
Acting Minister for Education
(Higher Education and Skills)

“NUS SCALE will enable Singaporeans to skill and re-skill for existing or new jobs. We will also help companies and industries stay competitive by providing lifelong learning opportunities for employees.”

Prof Wei Kwok Kee
Dean, SCALE

WHY SCALE?

The School of Continuing and Lifelong Education (SCALE) of the National University of Singapore offers adult learners opportunities to acquire new knowledge and skills, and to get up to speed on the latest information and practices in use at the workplace today.

We approach adult learning as an exciting, lifelong opportunity to scale up on the key skills needed by employers and industry. At NUS, our students will have access to the work of some of the best minds and teachers on staff, as well as our comprehensive network of industry experts who will work with our students to ensure that they master the new knowledge and skills.

The world we live in is changing rapidly. If you're thinking of better preparing yourself and/or your staff for the adjustments that might come your way, SCALE can help.

INDUSTRY-RELEVANT PROGRAMMES

We currently offer the following part-time Bachelor degree programmes:

- BTech in Electronics Engineering
- BTech in Mechanical Engineering
- BTech in Chemical Engineering
- BTech in Industrial and Management Engineering

In the pipeline: undergraduate certificate and graduate diploma courses, Bachelor's and Master's degree programmes as well as short courses and executive programmes.

All programmes will be designed with NUS faculties and schools, and in close consultation with Singapore's Workforce Development Agency and the Economic Development Board, to ensure they are aligned to market demand and industry needs.

From 2017, the new programmes we hope to offer will be in niche areas such as:

- Civil Engineering
- Supply Chain Management
- Information Security
- Business Analytics

Please visit scale.nus.edu.sg or contact us for more details.

HELPING ADULTS LEARN BETTER

To help you and your staff scale up or re-skill in the shortest time possible, we've designed the learning experience as a mix of online and face-to-face, hands-on learning. Our various curricula are current and skills-based, with a strong emphasis on experiential training. Besides tapping on the expertise of our teaching faculty, practitioners from relevant industries will be involved to ensure competent delivery of our programmes.

“ The global technological changes mean that much of the knowledge I had learnt many years ago is obsolete. The BTech Programme provided me with the opportunity to relearn at the age of 52. The learning journey at NUS has been enriching, and more importantly, I have developed invaluable bonds with friends and mentors. ”

Mr Jim Gan
NUS Industrial & Management Engineering
Class of 2013
