Data Analytics Begins with Me

Basic Data Analytics taught with a simple but powerful graphical user interface (“GUI”) drag-and-drop tool targeted at business analysts requiring more sophisticated capabilities than what a spreadsheet can offer.

Understanding and using data is increasingly an important part of an executive function. Whether you are a business analyst, customer service officer, physiotherapist, procurement officer or HR executive – the ability to understand where potential data is coming from, and to properly collect it, clean it and then analyze the data will be an important and critical skill.

The programme focuses on these core skills and provides you the knowledge to participate in the organisation’s data analytics process without any coding requirements.

**DATE**
THURSDAY 17 AUGUST 2017

**DURATION**
1 Day; 9.00am to 5.30pm

**VENUE**
NUS University Town Education Centre (Level 2)
