Knowing how to best express your results from your data science and machine learning algorithms is key to convincing your team and management your point of view. This programme will teach you visualization techniques using Python as part of your data science workflow.

In this programme, you will be shown how to leverage various Python libraries such as Matplotlib, Bokeh, Seaborn and others to enable you to focus on how to communicate with visualizations for maximum impact.

DATE
Monday, 23 October 2017

DURATION
1 Day; 9.00am to 5.30pm

VENUE
National University of Singapore

FEE
S$802.50 (includes GST)

PROGRAMME OUTLINE
- Understanding Visualization
- Interactive graphics
- Data Munging – a prelude to visualization
- Advanced data structures and visualization

WHO SHOULD ATTEND
Software Engineers, Data Scientists, Data Analysts

PRE-REQUISITES
Must be familiar with the Python programming language and statistics 101 at a pre-university level.
